

Re Value at Risk Service – Clearys

I used the service recently for a long established and valued commercial client . I really found it was of great value to us in a number of respects – Using the service meant that the client got ‘expert advice’ on an area on which we were not qualified to Advise on , the client really appreciated their exposure on underinsurance and ended up increasing sums insured by appx. 40%.. Both the client and ourselves received a very useful computer generated plan and summary sums insured report which we can use at future dates ...and an additional bonus from our perspective was that we did not have to spend many hours of unproductive time exhorting the ‘peril’ to the client of underinsurance – The report did all the talking .
